

# Peacetime Resistance

## Kings of Convenience

feeling the comfort of eyes is your sole intention  
we all want to be understood unconditionally  
but you have to realize that a viewer needs distance  
and the moment your wall melts down the inside is outside maybe way back in the past, when people were  
different  
shortening bonds made them last  
now we emphasize our difference  
we have been enrolled one by one for the peacetime resistance  
and we're fighting our battles alone we've got four eyes, so why yearn for one perspective?  
we've got colours with shades erased when blended  
we've got four eyes, so why yearn for one perspective?  
we've got colours, but they disappear when blended
