

Every Word

À%oÀ-À·À-Sade

Love is what the word was I saw a picture
How could you be so careless?
How could you have done that to us? And I write this letter
Send it all back to you
And every word you said In there every word, oh oh oh oh
How could you have done that to us? You treated me like a stranger
And all the time I was loving you
All your slick moves they were once innocent moves I wanted to look up to you
I really trusted you
And every word you said In there every word, oh oh oh oh
How could you have done that to us? Love is what the word was I was loving you like a child, yeah
All the time you were smiling the same smile
I was loving you like a child, I really trusted you Every word you said, every word you said
Love is what the word was Every word you said, every word you said
Love is what the word was, love is what the word was Every word you said
Every word you said I was loving you like a child, yeah
All the time you were smiling the same smile
I was loving you like a child, I really trusted you Every word you said, every word you said
I send it back to you, yeah Every word you said, every word you said
I send it all back to you, yeah
