Blood

Editors

This wicked city
Just drags you down
You're with the red lights
Your side of town
Don't say it's easy
To follow a process
There's nothing harder
Than keeping a promise
Blood runs through your veins
That's where our similarity ends
Blood runs through our veins
There's nothing believable
In being honest
So cover your lies up
With another promise

Blood runs through your veins
That's where our similarity ends
Blood runs through our veins, ah
Blood runs through your veins
That's where our similarity ends
Blood runs through our veins
Blood runs through your veins
That's where our similarity ends
Blood runs through our veins, ah
If there's hope in your heart
It would flow to every part
If there's hope in your heart
