# Don't Go Away

## [Buckcherry](Buckcherry)

In my darkest state of mind
I am riddled with despair
When I try and close my eyes
Your voice is all I hearI will think of you tonight
I will hold back all my tears
I've waited all these yearsPlease don't go away
You're making a mistake
You and I were meant to be
You opened up my eyes
And made me realize
Now it's changing everythingIts crazy how I feel this way
I cant explain, don't go awayI see your shadow all the time
I see your face inside my mirror
Like a sunset in the sky
You distract me from my fearsI keep holding it inside
And I wish that you were near
Its better when you're herePlease don't go away
You're making a mistake
You and I were meant to be
You opened up my eyes
And made me realize
Now it's changing everythingIts crazy how I feel this way
I cant explain, don't go awayAll the things you said
And all the games we played
Will come back to you
See the look in your eyes
Oh, don't go awayPlease don't go away
You're making a mistake
You and I were meant to bePlease don't go away
You're making a mistake
You and I were meant to be
You opened up my eyes
And made me realize
Now it's changing everythingIts crazy how I feel this way
I cant explain why I feel this wayIt's hard to say
I wanna make you see
What you mean to me
Dont go away
