Test Pattern

The Thermals

I believe, I believe
I could see, I could see
you forever in my hand

but I believe, I believe
I could leave and you would notice
then you would understand

and so I feel alone
wide and low
I feel you suffering sad

cause I believe, I believe
I could see, I could see
you forever in my hand

so you can call this a test pattern
so you dont have to commit
so you could change any day

I believe, I believe
you could see, you could see
me forever by your side

and I believe, I believe
if you leave, if you leave
I will cry, I will cry, I will cry

why do I feel so crazy now?
why am I losing my mind?

cause I believe, I believe, I believe
you could see me forever by your side

still you can call this a test pattern
so you dont have to commit
so you can change anyday
