Only Love

Linda Eder

I see you try to turn away
I hear the words you want to say
I feel how much you need to hide
What's happening inside you tonight?Come meet my eyes one moment more
Our eyes are different then before
This night so beautiful and strange
This night begins to change who we are[Chorus]
Don't turn away its only love
Quietly coming to you
Whispering through you
Take my hand its only love
Let it come through you slowly
Don't be afraid its only loveWe touch the dark begins to stir
We can't go back to where we were
Don't be afraid to make it real
Don't be afraid to feel tonightDon't turn away its only love
Only a touch that free's you
Let it release you
Take my hand its only love
Let it come through you slowly
Don't be afraid its only loveDon't close your eyes
Don't hold it in
Reach out to me
Let it all beginDon't be afraid its only love
Only a touch that free's you
Let it release you
Take my hand its only love
Let it come through you slowly
Open your heart and show me
Don't be afraid its only love
