Lights Are Low

Injected

Let's all go to the underground
Some kind of social lost and found
Check all your baggage at the gate
Makin' sense at six but I won't by eightPulled like a magnet to the door
The faces are new but you've seen them before
Spit out the truth that we're scared to say
That's why we come here anywayI like to live where the lights are low
Sometimes I feel there's nowhere to go
Set you alight and I'll set you free
You never meant that much to meI like to live where the lights are lowA couple shots and we're feelin' straight
We shoot it up 'cause I hate to wait
We're talkin' shit and we talk it loud
The seedy kids are my favorite crowdWell write your number down for me
To end up on the floor I guess it ain't meant to be
What's her name? Well I'm scared to say
That's why I came here anywayI like to live where the lights are low
Sometimes I feel there's nowhere to go
Set you alight and I'll set you free
You never meant that much to meI like to live where the lights are low
Sometimes I feel there's nowhere to go
Set you alight and I'll set you free
You never meant that much to meWhat's my game? You don't want to know
I took too much and I'm feelin' low
Set me free 'cause I'm on my knees
It's such a bitch you're so hard to pleaseI like to live where the lights are low
Sometimes I feel there's nowhere to go
Set you alight and I'll set you free
You never meant that much to me
