

Under The Northern Star

Amon Amarth

The icy winter is getting near
Dark skies above us
Biting frost is in the air
Darkness surrounds usThe cold piercing autumn breeze
Fills the long ships sail
Soon the lakes and seas will freeze
And snow will lay its veilMany years we have been away
Many oceans we have roamed
Now the North star guides us on our way
As we are heading homeThe many hardships we've endured
That brought us rich rewards
Now the North star guides us home
With cargo full of goldMany friends died on the way
Only few of us survived
But I would gladly trade them place
In Odens hall up highThe icy winter is getting near
Dark skies above us
Biting frost is in the air
Darkness surrounds usSoon the lakes and seas will freeze
And snow will lay its trail
And we will hope for the summer breeze
When we can set our sails
