There Is an Answer

A Great Big World

I am just a sailor in a great big sea
Searching for what's meant for me
And I thank my lucky stars every single day
I'm exactly where I'm supposed to beWhen the storm begins to blow
When I've lost my way back home
Oh, there is an answer
Oh, there is an answerThere is a ripple to every wave
A rhythm to the days and nights
And all our thoughts, they make the world go round
All our efforts multiplyMake a change, and you will see
One small step is all we need
Oh, there is an answer
Oh, there is an answerThere is no difference between you and me
It lies beyond our history
And if we only take the time to see we're all we need
Just take my hand, and see me as a brotherLook inside, and you will find
Love exists in every kind
Oh, there is an answer
Oh, there is an answerNear or far, oh I believe that love will find us there
Through the dark, oh I believe that love will find us there
Oh, I believe that love will find us there
Oh, I believe that love will find us there
Oh, I believe that love will find us thereOh, there is an answer
