Take a Stand

Triumph

Time is runnin' out
Hear it tickin' away
Future's closin' in
No reason to delayBreak the chains that hold you down, my friend
Don't wait any longer
Find the answers deep inside yourself
They're makin' you strongerTake a stand in the light
It'll be all right tonight
Fire it up, burn it bright
We can never give up the fightWe can make it all right
We can make it all right
We can make it all right
All right tonightClouds are rollin' in
Hear the thunder in the distance
Lightnin' strikin' all around me
Breaks my resistanceThe walls are crashin' in
The storm begins to tear down the system
The house is comin' down, it's all around
It's high time we listened, oh yeahTake a stand in the light
It'll be all right tonight
Fire it up, burn it bright
We can never give up the fightWe can make it all right
We can make it all right
We can make it all right
All right tonightTake a stand in the light
It'll be all right tonight
Fire it up, burn it bright
We can never give up the fightWe can make it all right
We can make it all right
We can make it all right, all right
We gotta make it all right tonight
