

Just Got Back from Heaven

Sparks

All I get is quiet
Laughing friends won't buy it
I've been known to tell them white lies
But this time I swear it's the truth, oh, oh
I just got back from heaven
I can see their faces
As I mention places
Places that I've overdescribed
But this time I swear it's the truth, oh, oh
I just got back from heaven

CHORUS

Heaven isn't so far away
You walk through the door
And you're light years away
Someone looks right into your eyes
And you feel the magic that you can't deny

And you sway

All through the night

If you stay

All through the night

Look at the shape I'm in

I just got back from heaven

Searching for some glory

People make up stories

One too many drinks at the bar

But this time I swear it's the truth, oh, oh

I just got back from heaven

CHORUS

Any destination

Makes a great vacation

This is something greater by far

This time I swear it's the truth, oh, oh

I just got back from heaven
