Enemies In Sight

Terror

So you're gonna tell me what's hardcore
Pass judgement on me and distort my words
I fucking gave my life to this
I talk too much, I contradict myself
I do the same old thing, I'm full of myself
Say what you say, it holds no weightI'm looking you in the eyes
Keep my enemies in clear sightNo more dead weight, cut it away
The force of vengence is inside of me
It's all coming back at youTill my heart stops this lives through me
Tried and true, proven longevity
It's you that cracks with timeI'm looking you in the eyes
Keep my enemies in clear sightI hope by now you know where this is coming from
30 long years and I'm still core as fuck
Time to shut you down, put you in check
Smash the truth in you face, and send you on your way
