

# Devils

## Dick Prall

Devils

Make the happiest couples

No one's innocent

Nobody's clean? except me

Swallow

Every siren you follow

'Til the moon

Settles down in the sea

Believe you from me

It's already out there

There's somebody waiting to be

Just your freak

To set you apart from why

Your happy is not your high

To tell you the things

From the songs that you sing

When you're all alone

And free free free

Are you failing

In your quest to be settled in

Is there something

That you'd rather do

Itchy

It's a matter to which degree

You can sit still

Until the need to run runs out of you

Believe me

It's already out there

There's somebody waiting to see

What you need

To take you apart from why

Your happy is not your high

And say all the things

From those songs that you sing

When you're all alone

And free free free

To set you apart from why  
Your happy is not your high  
And say all the things  
From the songs that you sing  
When you're all alone  
And free free free
