

Something About You (Edit) [feat. Kerli]

tyDi

When you look in my eyes, in my eyes
You see through me
I couldn't hide if I tried
You're stripping me
Down to my soul, carry on till I believe It's scaring me
Losing control
It's dangerous
And beautiful
There's something about you
There's something about you
There's something about you
Something about you, something about you
Something about you, something about you
Something about you, something about you
There's something about you
There's something about you
There's something about you There's something about
There's something about
There's something about
There's something about you
Something about you I come alive, so alive when you're with me
Everything locked up inside you're setting free
You got me torn, undefined, bout to release
It's scaring me
Losing control
It's dangerous
And beautiful There's something about you
There's something about you
There's something about you
Something about you, something about you
Something about you, something about you
Something about you, something about you
There's something about you
There's something about you
There's something about you There's something about you
There's something about you
There's something about you
Something about you
Something about you
