

Whisper

Common Children

In this festival of time when I seek but will not find
Would you shine some feelings into my eyes?
Could you climb with healing into my tired mind?
Into my own mind In this revelry of days when I'm trapped inside my cage
Would you fly some easy freedom inside?
Could you climb with healing into my tired life?
Into my own life When the silence burns my ears
And I frolic through my fears
When I stain myself in shame
I still whisper out your name Oh, won't you come down
And burn your light through me?
And save me and heal me Oh, won't you come down
And burn your light through me?
And save me and heal me When the silence burns my ears
And I frolic through my fears
When I stain myself in shame
I still whisper out your name
I still whisper out your name Won't you burn your light through me?
And heal me and save me I will whisper out your name
