Escape

Eyes Set to Kill

Grind your teeth, bite your tongue till it bleeds
From beneath, they've come out to feed
Only we can mold our own destiny
Believe in me for I'm the light and now I must lead
They'll come scraping like violent wind and we will take cover
We'll be ready on our own, it's been so long, will we ever see the sun?
We've been alone, counting the days will they breach our hide away
Surrounded by darkness we made it all this way
We'll fight off the darkness and plan for our escapeSincerely, I knew you could depend on me to get us out of here alive
If only we had more time to plan but now we flee, believe in me
They'll come scraping like violent wind
How long til it's over?
We'll be ready on our ownIt's been so long, will we ever see the sun?
We've been alone, counting the days will they breach our hide away
Surrounded by darkness we made it all this way
We'll fight off the darkness and plan for our escapeThey'll come scraping like violent wind and we will take cover
We'll be ready
They'll come scraping like violent wind and we will take cover
We'll be ready
They'll come scraping like violent wind and we will take cover
We'll be ready on our ownIt's been so long, will we ever see the sun?
We've been alone, counting the days will they breach our hide away
Surrounded by darkness we made it all this way
We'll fight off the darkness and plan for our escapeDarkness is an illusion
Just don't fall for it
Come with me and take my hand, take my hand
