

Dragonfly

Dust For Life

So stare into the sun, the fields are turning blue
It's clear to everyone who you've been talking to
Go on, refuse to dream, cold world of endless need
My little dragonfly on dark wings, you come to me
Waiting for the sun to shine, waiting for the light to find
And it's taking all I know, to give it up and let it go
No truth I can explain, no sense in talking to
Flames take another one, I see I'm smoking too
Go on refuse to see, in dark clouds the ravens weep
My little dragonfly on dark wings, you come to me
My little dragonfly on dark wings, you come to me
My little dragonfly on dark wings, you come to me
My little dragonfly on dark wings, you come to me
