

# Congratulations

## Juliana Theory

You kiss your life goodbye  
Like lovers in the night  
Returning home alone  
As if you suffered a heart attack  
And under the weight of the world  
That nearly broke your back  
It was written on your face  
I could see it in your face Congratulations  
Today is another day  
It's coming crashing down to break you again  
Congratulations  
You can change  
Sometimes when lying on your back  
You learn to breathe again Black out your bitterness  
Forget your jaded bliss  
Your shadow falls on me  
You blame it all on a mutiny  
When everybody around you always seems so free  
I can see it in your eyes  
It's burning in your eyes Congratulations  
Today is another day  
It's coming crashing down to break you again  
Congratulations  
You can change  
Sometimes when lying on your back  
You learn to breathe again Nothing left to lose  
There's nothing left to lose  
Nothing left to lose  
There's nothing left to lose Congratulations  
You have another day  
It's coming crashing down to break you again  
Congratulations  
You can change  
Sometimes when lying on your back  
You learn to breathe again There's nothing left to lose
