

Liquid State

Laura Smith

Take me for a ride, break me up and steal what's left inside
And make them pray, the iniquity has died inside and left a scar

I'm all red and done

Bring me peace and wash away my dirt

Spin me round and have me to divert

And walk into the light

Warm my heart to remind

And hold my head up high

And help me to survive

Kick me when I'm down

Feed me poison, for me till I drown

Wake me up before I get punched out and fall into the night

Warm my heart to full

And hold my head up high

And help me to survive
