

# Incisions

## Exotype

She paints a pretty picture we can all adore  
She's covered in razor lines and dynamite  
You've shown me how to dissect your beating heart  
And just how far these fake smiles can go  
So glamorous (shattered like glass)  
Fingers shoved to the back of your throat  
For a little sex appeal, heaving  
Don't forget to call the ambulance when your body hits the floor  
So fucking perfect  
Your execution will be televised  
You threw it all away for a piece of the action  
Vanity assassin  
With cuts like a diamond and wrapped in plastic  
The whole world is crushing on you  
The whole world is watching you die  
Enjoy living on top of the world  
When you die knowing you lived your life on your knees  
Die knowing you lived your life on your knees
