

Something Going Round

Hanson

Are you falling asleep at the wheel
Maybe theres a feeling
You've been brushing off Asking reason what's left for me here
When he's all out of answers
But you're not out of luck Cause I've got this something
That's been going round
Well, I've got this something
You don't know it but you need it I've got this something
That's been going round
Well, I've got this something
You don't know it but you need it now Are you hungry?
Won't you come get your fill?
We could get this thing in motion
If you'd stop acting tough Superstar, you sit up high on your hill
Well, I know why you're running
Only you know what you've lost Cause I've got this something
That's been going round
Well, I've got this something
You don't know it but you need it I've got this something
That's been going round
Well, I've got this something
You don't know it but you need it now When the sun goes down, it's here waiting
Its still right here for you now
And when the sun comes out, it's still waiting
Its still right here for you now Yeah, well, I've got this something
I've got this something
That's been going round, yeah
You don't know it but you need it I've got this something
I've got this something, yeah
I've got this something
You don't know it but you need it
Yeah, yeah, you don't know it
Yeah, you don't know it but you need it I've got this something
I've got this something, yeah
You need this something now
