Wake Up

Waldeck

There's a guide to take me home
Led me through the night
Stood against the storm
And taught me prideDid they weigh you down?
Did they boil the salt?
Did they mess you up
In your fancy loft, baby?There's a smile that broke my heart
That sparkles in your eyes
You're falling apart
Now you're living liesDid they change the rules
Without telling you?
What a surprise
Who needs who now babyTake a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake upTake a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake upTake a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake upWake upThere's a spirit of our youth
Won't solves your thoughts
Used to care about truth
And fight against the oddsDid they make you trade
The dreams of old
Did they tell you
It was cool to be cold baby?There's a light that you once shown
Clouded you la don
Everything is lone
And everybody is goneWas life rough on you
Did it fit no more
As we fibbin' you to my dorm
Now babyTake a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake upTake a break and come down
Take a chance and start
Take a look in the mirror

Take the pill to wake upIf you need someone
To [Incomprehensible] night
You can count on me
Everything will be, alrightAlrightIf you need someone
To [Incomprehensible] night
You can count on me
Everything will be, alright
