On the Air

Saga

We're on the air tonight
We're on the air tonightReach up high as you wave good-bye
One the air, on the air tonight
You can fly, you can fly all night
No-one's there, everything's all rightCommunicate, extrapolate
Just sign up, if you dare
Accommodate, just don't be late
We're living on the airRefrain:
I wanna be miles and miles away
If you show it, I can load it,
I can fight it, I can be it
I'll send you a little something
But you might not even see it
I wanna be miles and miles away
I can run it, I can sum it,
I can hide it, I can steal it
When I'm goin' a little fast
Sometimes I crash but I don't fell itCommunicate, extrapolate
Just sign up if you dare
Accommodate, just don't be late
We're living on the airIs ist just me? Didn't you feel that
Or am I the only one?
Cos' if it's just me, then
I'm on the air on my ownYou know and I know
That you might be a no-show
So where to? Only God knows
So just say helloRefrainHere we go, turn the lights down low
Gives the screen such an eerie glow
You don't know where you're gonna go
But, it's all right, let the night unfoldCommunicate, extrapolate
Just sign up if you dare
Accommodate, just don't be late
We're living on the airIs it just me? Didn't you feel that
Or am I the only one?
Cos' if it's just me, then
I'm on the air on my ownYou know and I know
That you might be a no-show
So where to? Only God knows
So just say hello
