

# On the Air

## Saga

We're on the air tonight  
We're on the air tonight Reach up high as you wave good-bye  
One the air, on the air tonight  
You can fly, you can fly all night  
No-one's there, everything's all right Communicate, extrapolate  
Just sign up, if you dare  
Accommodate, just don't be late  
We're living on the air Refrain:  
I wanna be miles and miles away  
If you show it, I can load it,  
I can fight it, I can be it  
I'll send you a little something  
But you might not even see it  
I wanna be miles and miles away  
I can run it, I can sum it,  
I can hide it, I can steal it  
When I'm goin' a little fast  
Sometimes I crash but I don't fell it Communicate, extrapolate  
Just sign up if you dare  
Accommodate, just don't be late  
We're living on the air Is it just me? Didn't you feel that  
Or am I the only one?  
Cos' if it's just me, then  
I'm on the air on my own You know and I know  
That you might be a no-show  
So where to? Only God knows  
So just say hello Refrain Here we go, turn the lights down low  
Gives the screen such an eerie glow  
You don't know where you're gonna go  
But, it's all right, let the night unfold Communicate, extrapolate  
Just sign up if you dare  
Accommodate, just don't be late  
We're living on the air Is it just me? Didn't you feel that  
Or am I the only one?  
Cos' if it's just me, then  
I'm on the air on my own You know and I know  
That you might be a no-show  
So where to? Only God knows  
So just say hello
