

Until Death (Us Do Part)

Front 242

Now you have me
Now I'm there
Now I have you
Now you care Now I got you
Now you care
Now you have me and
Now I'm there Now we're tied, until death us do part
Now I'm making my way inside
Now I'm feeding myself with you
And the more I grow, the more you decline
Now we're tied until death us do part Lock
Lock space the space door space
Forever Now it's time for you to be sure
That the life we share will be long
That what can't be cured has to be endured
Now we're tied until death us do part Lock
Lock space the space door space
Forever
