

Run

Ben Kweller

Over hills, over dales
I'll run with you
If it works, if it fails
I'll run with you Since fifteen I have ran
Everywhere you can run
But together is much better
So let's run, let's run, let's run Empty hands, tired feet
I'll run with you
On the sand over concrete
I'll run with you Since fifteen I have ran
Everywhere you can run
But with you it's much more fun
So let's run, let's run, let's run It doesn't matter that they say we'll never make it
It's so strong that nothing could ever break it
You and I can tackle anything of any size All anyone could ever want is a co-pilot
Someone to leave this town and up and start a secret
And when you sleep at night, I'll kiss you right between your eyes Over hills, over dales
I'll run with you
Down the mountain through the trails
I'll run with you Since I was fifteen I have ran
Everywhere you can run
I'm not done with my traveling
So let's run, let's run, let's run I'm not done with my traveling
So let's run, let's run, let's run
I'm not done with my traveling
So let's run, let's run, let's run
