

# Shine (Radio Edit)

**Parov Stelar**

When our souls were introduced  
No one of us could ever know  
What we will be going through  
Feeling high, feeling low  
Been in hell, been above  
Cried for help, cried for love  
And when darkness sleeps beside you  
And the morning is far away  
I wanna hold your hand and guide you  
Out of hell, out of darkness  
Finally we're able to see  
See the beauty not the beasts  
One step further up at least  
But one day  
We will shine, we will shine  
We will fly so high  
We will shine, we will shine  
We will fly so high  
High
