Rusted Wheel

The Belle Brigade

If you wanna derail this train
Bend away the track, say you love me back
The way I love you
No whistle blows
And the rhythm slows down
A train without a will, happy standing still
A rusted wheel
So come on come on come on and
Go away, take away from me your love
Because because because
It's everything I could ever need
My love it's true
'Cause I don't I don't I don't want you
To be just waiting at the station at my destination looking for me
What keeps me rolling rolling in locomotion
Is chasing a dream blowing out steam to look for you
So come on come on come on and
Go away, take away from me your love
Because because because
It's everything I could ever need
Come on come on come on and
Go away, take away from me your love

Because because because
It's everything I could ever need
My love you see
'Cause I never never wanted to be
A rusted wheel
A rusted wheel
Covered in grass
Trying to grow fast
A rusted wheel
A rusted wheel
Nowhere else to go
No more steam to blow
A rusted wheel
So come on come on come on and
Go away, take away from me your love
Because because because

It's everything I could ever need
My love it's true
'Cause I never never never never never
Never never never never want you
'Cause I never never never never never
Never never never never want you
