Electrify

Duwende

Tension, sublime
You been waiting around a long time
To see us in this place
Go on, stare right in the face
All the waiting by you
Oh, just let me tell you
So long, too long
That?s why this here is our theme song

CHORUS
I can?t even lie, we electrify
I believe I done worked it out
I can see what the fuss has been all about
Ain?t no need to lie, we electrify
I believe I done worked it out
Follow me and you?ll see that there ain?t a doubt, now

Promises, they were made to be
All true and I can finally see
Everything you said to me
Is happening right here, today, yea
Every time that I doubted it
Was fuel to my fire that burned a bit
Now I see that I was wrong
That?s why this is my theme song, baby

CHORUS

Give my word for what you heard
Whatcha gonna do when it all comes true?
And it?s coming up, I?ll be telling you how
If you?re in the crowd, then you?re feeling it now
Ain?t no coming down when it?s coming around
We?ll be coming down when the limit is found
Gonna, gonna, gonna give it to you baby

Let?s get down just you and me tonight
Come on baby ?til the morning light
Let?s get down just you and me tonight

?Cause you?re making me feel so right

Up front, in back
Whole crowd ?bout to have a heart attack
Cold sweat gonna make you drown
So hot gonna melt it down
My perspective up here
So far, so clear
Coming up, like a dream
That?s why this song is our theme

CHORUS x2
