

Magic

O'G3NE

Light is in the air, fight is over there
Let me see you care and it feels like magic, like magicWalking on a path that is so clear
Never saw your face but I felt you near
Living in a room with the window(s) shut
Holding on a dream that we once forgot
All here cause we're meant to
So it already feels like we know you
Seeing stars doesn't mean you're not one

Share ultimate light even though your fallenLight is in the air, fight is over there
Let me see you care and it feels like magic, like magic
Looking at this crowd, friends are what we found

Love is all around and it feels like magic, like magicSeeking for a purpose on this globe, mmm
Heading for the stage that gives me hope
Don't let bad echoes get you down
You've got the leading voice let's make a sound
All here cause we're meant to
So it already feels like we know you
Seeing stars doesn't mean you're not one

Share ultimate light even though your fallenLight is in the air, fight is over there
Let me see you care and it feels like magic, like magic
Looking at this crowd, friends are what we found

Love is all around and it feels like magicAnd it feels like music is born in our souls
Is it you that kept me holding on?
Oooooh
The river may be strong
But we're solid as a stone

We're family so we won't be aloneLight is in the air, fight is over there
Let me see you care and it feels like magic, like magic
(Oooooh)
Looking at this crowd, friends are what we found

Love is all around and it feels like magic, and it feels like magic, magic
