Germ

Kyshera

Exported Measles and Smallpox
To fumigate the garden for the Children of choice.
To keep Eden giving they controlled the spread of weeds
To protect they're own seeds.
Imported & domesticated beasts for the farm
And spread a little Syphillis to keep the ratio as it should be
Then an anonymous virus claims a million,
And they expect us to believe them when they blame it on a Green Monkey

In a 1969 senate appropriations hearing,
10 million dollars was requested to develop a disease.
A new Micro-organism unknown to nature
That would lay waste to the human immunological system
The money was approved, the taxpayers never knew
And it was to be ready for deployment within 10 years
Then 1981 began the modern Anomaly of Instant Disease Scares, origins always unknown.

Through the eyes of this planets kings, we're nothing but cattle
To be bred & slaughtered as they need.

They created deadly sex, they don't want us breeding
And pesticidal people weeding keeps the global population in a water lock under their rule.
Then they created deadly living so the living keep giving up
Their freedoms for the chance to be saved by the doctors of the plague.
So long as we believe in foreign lands of darkness
The homely hand of darkness is forever around our neck
But the most powerful weapon only costs a question
And the ugliest of truths is the only thing to ever set us free.

Out of sight and out of mind makes the pill seem sweeter
Until your number is the next one called.
