

# **RU 486**

## **Pain Teens**

It's for me, the wonder drug of the century  
Now I will be all I can be, at last I'm free of my anatomy  
You can't control me any more, you can't tell me what to be  
I can walk through any door, just keep your judgements of me

RU 486

Now my live is all my own, I'm not forced to reproduce  
Prudes and hypocrites will moan, they're the ones that stand to lose  
There are too many of us now, we are starving every day  
The benefits are so much more if there are less of us  
We'll control our destiny, it'll take our sins away  
Ending teenage pregnancy, setting all young women free
