

Say Something

The Mynabirds

But you don't
But you don't Struggle in silence to find your ghost
You're sitting half a world beside me
Something lonely
Lovers know
Say something,
Say something now I put our records on and played every song
Don't you remember how we got here
But now the needle skips my favourite parts
Say something,
Say something now
Say something,
Say something now Fight a war or get back into bed
If you mean it, say it
I thought we're changing
I thought we're changing
Spent a long time up in the air
Been a long time waiting
(Say what's on your mind)
I thought we're changing
I thought we're changing Do we love to let it go?
Say something,
Say something now
Won't you say something,
Say something now Fight a war or get back into bed
If you mean it, say it
I thought we're changing
I thought we're changing
Spent a long time up in the air
Been a long time waiting
Say what's on your mind
I thought we're changing F*cking up in the only way I know
Why start when the only way to show
Our love is broken back
And is it love if it don't come easily
Stand scared with my heart in front of me
It's the only one I have.
