Association Girl

Second Class

another day another opportunity for her to associate herself with someone else no one particular just someone new that she can use for a while then put back on the shelf here we go again i'm getting closer to getting over but this time she says it will be different i'm getting closer to getting over but this time she says it will be different for her and when the next best thing has all been but exploited then she'll find her way back to that shelf looking for something that can fill this temporary void at least until she's temporarily ok here we go again i'm getting closer to getting over but this time she says it will be different i'm getting closer to getting over but this time she says it will be different for her i'm finding out without a doubt that its quality not quantity and i'd rather be all alone i'm getting closer to getting over but this time she says it will be different i'm getting closer to getting over but this time she says it will be different for her
