A Little High

Simon Webbe

Stranded
I've been watchin' while you're burning bridges around you
Think you're helpless
Broken by the alibi's and promises that weren't trueBut it's not all bad
You know that you can bring it all back
Reach out and find what you once had
And you'll see if you read all the signsI can see that you're in need of some protection
Don't fret, don't cry
Just go ahead and change it, just gotta face it
Everybody needs a little highI can make you the centre of attention
Let me dry your eyes
It's kinda been rough lately, live it up, baby
Everybody needs a little highSay it now, if you wanna run away just
Say it now, use a little self control
Say it now, oh yeahOh, your life is wasted
The colours in your heart are slowly fading, inside you
Branded by the words you heard
That left you jaded, confusedBut it's not all bad
You know that you can bring it all back
Reach out and find what you once had
You get where you want if you read all the signsI can see that you're in need of some protection
Don't fret, don't cry
Just go ahead and change it, just gotta face it
Everybody needs a little highI can make you the centre of attention
Let me dry your eyes
It's kinda been rough lately, live it up, baby
Everybody needs a little highAll your mistakes are easy to change
Don't let regrets stand in your way
Your intuition on which way to take
Woh, yeahI can see you're in need of some protection
Don't fret, don't cry
Just go ahead and change it, just gotta face it
Everybody needs a little highI can make you the center of attention
Let me dry your eyes
Girl, been rough lately, live it up, baby
Everybody needs a little highSay it now, if you wanna run away just
Say it now, use a little self control
Say it now oh yeah
Everybody needs a little highSay it now, if you wanna run away just

Say it now, use a little self control
Say it now
Everybody needs a little highSay it now, if you wanna run away just
Say it now, use a little self control
Say it now
Everybody needs a little high
Say it now
