

# Calm Before the Storm

## Fall Out Boy

I sat outside my front window, this story's going somewhere  
He's well hung and I am hanging up  
There's a song on the radio that says  
"Let's get this party started, let's get this party started" What you do on your own time's just fine?  
My imagination's much worse, I just never wanna know  
What meant the world imploded  
Inflated and demoted all my oxygen to product gas  
And suffocated my last chance  
You said between your smiles and regrets  
Don't say it's over  
Dead and gone, dead and gone Calm before the storm  
Set it off and the sun burnt out tonight  
Reception less than warm  
Set it off and the sun burnt out to The next time the phone can wring my neck as it gets no answer  
And of the time that I've spent telling it my roots  
I'm shaking in my boots  
And still it looks at me like an old friend I've betrayed  
The darkside of the doormat is the one your shoes have frayed. What you do on your own time's just fine?  
My imagination's much worse, I just never wanna know  
What meant the world imploded, inflated then demoted  
All my oxygen to product gas and suffocated my last chance You said between your smiles and regrets  
Don't say it's over  
Dead and gone, dead and gone Calm before the storm  
Set it off and the sun burnt out tonight  
Reception less than warm  
Set it off and the sun burnt out to Calm before the storm  
Set it off, set it off Calm before the storm, set it off  
And the sun burnt out tonight  
Reception less than warm, set it off  
And the sun burnt out tonight The sun burnt out tonight  
The sun burnt out tonight
