Lovesick

Bloodflowerz

moonspell
i fell
a deadly knife inside my hand
a bloody trace is drying in the sandtoo late
it's all fate
a victim of the wounded night
i fade 'cause i am loosing my last fightall starts and ends in one fateful kiss
when we once touch what we ever miss
our endless quest has just begun[chorus:]
love me to death and i love you more
take my last breath, it's a touch to the core
love me to death and i love you more
'cause love is the reason we die formoonspell
a broken shell
stranded by the deep black sea
creeping fear gets deeper inside of memy blood in the flood
stains the raging ocean red
when the dawn is rising i'll be deadall starts, all ends in this fateful kiss
when we once touch what we ever miss
our endless quest has just begun[chorus:]
love me to death and i love you more
take my last breath, it's a touch to the core
love me to death and i love you more
'cause love is the reason we die forlove me to death, love me morethe poison of my pain is running through my veins
the moon drives me insane and i fall againlove me to death, love me more
