

Mine Field

Petra

Smell the burning powder? There's danger in the air
A voice from deep inside is telling you you must beware
Then enemy is watching every step you take
To find his opportunity in every choice you make
And it's no game when someone lives without His grace
And who's to blame when it blows up in their face
It's a mine field, you'd better follow Him through
God knows the way, you'd better stick like glue
It's a mine field, better stay on His heels
'Cause the enemy kills and the enemy steals
So keep your head down and keep you eyes peeled
'Cause life is, life is a mine field
Think the grass is greener? You'd better look around
Everywhere you look another casualty is found
The enemy is waiting for you to start to run
Waiting like an itchy finger on a loaded gun
And some may feel they can wander out too far
They may heal but they may always wear the scar
It's a mine field, you'd better follow Him through
God knows the way, you'd better stick like glue
It's a mine field, better stay on His heels
'Cause the enemy kills and the enemy steals
So keep your head down and keep you eyes peeled
'Cause life is, life is a mine field
Better leave the navigation to the one who knows the way
He will bring illumination, He will light your path each day
It's a mine field, you'd better follow Him through
God knows the way, you'd better stick like glue
It's a mine field, better stay on His heels
'Cause the enemy kills and the enemy steals
So keep your head down and keep you eyes peeled
'Cause life is, life is a mine field
It's a mine field, better watch where you tread
Step off the path and you could end up dead
It's a mine field, better stay on His heels
'Cause the enemy kills and the enemy steals
It's a mine field, you'd better follow Him through
God knows the way, you'd better stick like glue
It's a mine field, better stay on His heels
It's a mine field, better stay on His heels
