

Solid Liquid Gas

They Might Be Giants

Solid, liquid, gas
Solid, liquid, gas Ice is a solid
Water is a liquid
Steam is a gas Rock is a solid
Milk is a liquid
And air is a gas When water's warm enough it's a liquid
When it's cold enough it's a solid
And when it's hot enough it's a gas So could you make the air so cold it would be solid?
Could you make rock so warm it would be liquid?
Could you make milk so hot it would be a gas? Solid, liquid, gas
