Balloons

The Orange Lights

There's a thing called
There's this thing called
We fly balloons on this fuel called
We fly balloons on this fuel called love
What's a chkacha?
What's a fuel called?
Fairweather storms are in your head
Fairweather storms are in your head
We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called
We fly balloons on this fuel called love
There's a thing called
There's a thing called
There's a thing called

There's a thing called
There's a thing called
There's a thing called
There's a thing called
There's a thing called
We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called
We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called
We fly balloons on this fuel called love
