Follow Your Leader

I See Stars

Just try to keep in mind life is too short to be wasting all your time
So sick of playing this game of follow the leader
And it seems the world is held together by the same strings that tug our hearts
And they twist and they pull and get tangled up
And it seems we're all so stuck in this normal way of livingYou aren't taught to follow your dreams
American standard
The future's as bright as it seems
There's evil in this world even if you don't see it
You have to look a little closer
You have to lend me your ears
And just try to keep in mind life is too short to be wasting all my time
Obsessed and terrified
We're the ones who control our lives
So sick of playing this game
FuckYou want truth, I can't tell you what is real on that shining box you call a life
I refuse, I resist to live this
Solve or be solved, walk the walk
Follow the leader
Follow your leader
I refuse; I resist to live this way
Will you find your own way
Just try to keep in mind life is too short to be wasting all my time (x2)Just try to keep in mind
Life is too short to be wasting all my time
Obsessed and terrified
We're the ones who control our lives (x2)Just try to keep in mind
Life is too short to be wasting all my time
We're the ones who control our lives
Yeah we're the ones who control our lives
