

Neoprene Byzantine

Closure in Moscow

Is that the kind of vacuous dish that you really want to trifle with? Well...

I got someone that'll really do it for you

Pretty little thing, only seventeen

And she just, she just wants to be desired

So go claim your prize honey but when you're done,

There's just one tiny thing you should keep in mind

Satan's cloud

You'll know it when you're dipped

Into her brinePlease strut on into my future

You know the one track on my mind runs from her lips to her thighs

Oh what a libertine lady!

Little Miss Constantinople

Modified and totally fine, imperial legendary lover

Ornamental for sure

Yeah I bet that she got more heavy feminine artillery under covers

Now you see the thing is most women...

If they're smoking well she's a fire

And this saucy inferno here

(Who's got her hands full with an arms race at the moment)

Is a bona fide Byzantine empress dressed up like a tacky futurephiliac

Ooh that tacky ornamental upgrade to romance

Next level woman, paid for in goldPlease strut on into my future

You know the one track on my mind runs from her lips to her thighs

What a libertine lady! Wanna make her my Byzantine baby!

Head to toe in neoprene

I'm swimming in shark fin scenarios and they only go when I'm diving down into her brine

With that atomic attraction and a weapons-grade touch

I bet she traveled through time just so she can get her fuck on

Neon ring on her finger, silver bells on her toes

Sounds like a megaton chime, when she walks by it goes

RING-A-LING-A-DING-DONG, there you go...

Anthem to a sexual freak out!

She said: "Hey boy, I'm the kinda girl you only find in your dreams,

and it only took four surgeries to get this neoprene!

It's a feel like no other, salacious rubber in any color you want it to be"Please strut on into my future

(I'm begging you now)

You know the one track on my mind runs from her lips to her thighs

What a libertine lady! Wanna make her my Byzantine baby!

Head to toe in neoprene

I'm swimming in shark fin scenarios and they only go when I'm diving down into her brine
