Machine Gun

Saxon

Move in to the front underhanded fire
Hear the bullets flying millions every hour
Tracers in the night shooting across the sky
For God's sake cover me, I don't wanna dieMachine gun
Machine gun
Machine gun
Machine gunOver the top into the wire
Running like a madman into the fire
No-man's land, fighting for your life
Fighting hand to hand, forced to use your knifeMachine gun
Machine gun
Machine gun
Machine gunCome the wheels of terror crushing all before
Chews you to the bone to hear the monsters roar
With the clash of iron the battle's never won
For the forgotten soldier it's only just begunMachine gun
Machine gun
Machine gun
Machine gun
It's gonna shoot you downMove in to the front underhanded fire
Hear the bullets flying millions every hour
Tracers in the night shooting across the sky
For God's sake cover me, I don't wanna dieMachine gun
Machine gun
Machine gun
Machine gunCome the wheels of terror crushing all before
Chews you to the bone to hear the monsters roar
With the clash of iron the battle's never won
For the forgotten soldier it's only just begunMachine gun
Machine gun
Machine gun
Machine gun
Gonna shoot you down
