

# Love to Love

## The Monkees

Love's a thing that needs one to thrive on  
Then it grows  
At least that's what I've been told  
You can't love someone  
If you find that all you get in return  
A heart that's cold

They say you need love to love  
You gotta have love to love  
They all say it works that way.  
But if it's true,  
Why do I love you?  
Why do I love you?

Seems like you keep trying to break me  
You do things designed just to make me cry  
And I've heard if warm lips don't touch you  
Love won't grow no matter how much you try

Why do I love you...?

---
