

Together

Krystal Meyers

We all long to belong
We all need to be needed
Loneliness is our disease
Still we bite the hand that feeds
Where did we go wrong? Insecure and self-sufficient
Building up walls instead of bridges Let our lonely hearts collide
We're made to live this life together, together
Reach across this great divide
'Cause standing side by side is better, together All the pride that we defend
Teaches us to pretend
Like we can make it on our own
But we were never made to walk alone Let our lonely hearts collide
We're made to live this life together, together
Reach across this great divide
'Cause standing side by side is better, together Let the lines between us disappear
It starts now, it starts here, yeah Let our lonely hearts collide
We're made to live this life together, together
Reach across this great divide
'Cause standing side by side is better, together Together, together, together, together, together, together
Together, 'gether, 'gether, 'gether, 'gether, 'gether, together
