All for You

Kristy Starling

Crowded rooms, empty streets
I can always find You
Late at night while the whole world sleeps
You're the one I turn toAnd it's no sacrifice, it's a natural thing
When you love when you live and you get what you giveAnd it's all for You, everything I do
I just look to the skies and know why I'm alive
You're my morning star, You're my guiding light
When the world gets me down, You'll be right by my sideMy heart, my dreams are blessed to me
My faith is in the air I breathe
And it's all for You, all for YouIf I could fly through the darkest storm
I know You will be there
When my soul is lost and the map is torn
You're the one I'll see thereAnd I know whom I get in the moment like this
When you love when you live and you get what you giveAnd it's all for you, everything I do
I just look to the skies and know why I'm alive
You're my morning star, You're my guiding light
When the world gets me down, You'll be right by my sideMy heart, my dreams are blessed to me
My faith is in the air I breathe
And it's all for You, all for You
It's all for You, all for You
Oh Lord, it's all for YouYour spirit shines upon me everyday
Nothing's impossible when I know Your love leads the wayAnd I know who I am in a moment like this
When your love and you live and you get what you giveAnd it's all for you everything I do
I just look to the skies and know why I'm alive
You're my morning star, You're my guiding light
When the world gets me down, You'll be right by my sideMy heart, my dreams are blessed to me
My faith is in the air I breathe
And it's all for You, all for You
It's all for You, all for You
It's all for You, all for You
It's all for You, all for You
