Small Town Love

Landon Wall

ive been around the world seams like a million times made that trip with you
inside my mind all of our hopes and dreams seam like there coming true my favrite
part is shareing them with you a home town boy and a home town girl chaseing our dreams in a grate big world
was so far from home wishing on a star but these bright lights wont ever change who we are two kids with big
city dreams and small town love
remember to crazy kids dragging there guitars down the side walk to a honky tonk bar
the looks on peoples faces words could not explain when we left that town Nashville knew our names a home
town boy and a home town girl chaseing our dreams in a grate big world was so far from home wishing on a star
but these bright lights wont ever change who we are two kids with big city dreams and small town love we both
know were blessed to do what we do liveing in a dream come true becase my dream was to sjare it with you a
home town boy and a home town girl chaseing our dreams in a grate big world was so far from home wishing
on a star but these bright lights wont ever change who we are to kids with big city dreams and a small town love
to kids with big city dreams
