

# Come On Kids

## Tegan And Sara

We were so high we  
Thought we'd definitely die  
'Cause we were dead already, dying  
Endless nights took on my whole life  
Or so I thought  
It turns out that all your friends  
They were just mean  
Dressed up  
So, come on kids eat those pills  
You got your whole life to lose  
We've got so many friends  
That wear their feet too big for their shoes  
We've got cities to visit  
We've got trees we've yet to live in  
And so get yourself on top of me  
Before I'm gone, gone, gone  
We were so young  
I thought that acting old  
Would give me all your love  
Give me all you've got  
So come on kids eat those pills  
You've got your whole life to lose  
And we've got so many friends  
That wear their feet too big for their shoes  
We've got cities to visit  
We've got trees we've yet to live in  
So get yourself on top of me  
Before I'm gone, gone, gone  
And all night long on your front lawn  
You'd build me a neon village  
And you said bring on new diseases  
If they're good for you  
Then they'll be good for me  
Yeah, if it's good for you  
Then it's good for me  
If it's good for you then it's good for me  
So come on kids eat those pills  
You've got your whole life to lose  
And we've got so many friends

That wear their feet too big for their shoes  
We've got cities to visit  
We've got trees we've yet to live in  
And so get yourself on top of me  
Before I'm gone, gone, gone  
And we've got so many friends  
That wear their feet too big for their shoes  
We've got so many friends  
That wear their feet too big for their shoes  
We've got so many friends  
That wear their feet too big for their shoes  
We've got so many friends  
That wear their feet too big for their shoes  
That wear their feet too big for their shoes
