Everything Right Now

Travis Garland

Baby you're the moon, far above me
I just want you close
I'm what you desire, so don't try to love me, yeah
'Cause you can't have them both
Oooooooh
Pretty little thing
You know what I want, I want it all
(Everything, everything, wanna)
I want it all
(Everything, everything, want it)
I want it all
(Everything, everything, want it)
I want everything, everything right now
(Everything, everything, want it)
I want the world
(Everything, everything, want it)
I want my girl
(Everything, everything, want it)
I want everything, everything right now
Everything, right now, right now
Borrowed all your life
'Til it shattered ('til it shattered)
Now you gotta steer, oh no
(Now you gotta steer, oh no)
Fire in my bombs
Just to matter
When nothing's even real
I want it all
(Everything, everything, want it)

I want it all
(Everything, everything, want it)
I want it all
(Everything, everything, want it)
I want everything, everything right now
(Everything, everything, want it)
I want the world
(Everything, everything, want it)
I want my girl

(Everything, everything, want it)
I want everything, everything right now
[Talking, pause]You know what I want, I want it all
[Instrumental](I want it all)
Everything right now
You know what I want, I want it all
(Everything, everything, want it)
I want it all
(Everything, everything, want it)
Hey, oh no
(Everything, everything, want it)
I want everything, everything right now
(Everything, everything, want it)
I want the world
(Everything, everything, want it)
I want my girl
(Everything, everything, want it)
I want everything, everything right now
