

# Counterfeit Sky

## Failure

It's no mistake  
It's all your fault  
What holds you down  
Just find your ghost One more satellite breaks you down  
The counterfeit sky sells you out  
After all the change, nothing's changed  
Wake up laughing and don't know who you are It's not a switch  
Or a reflex  
In all the ways  
You sink your guest One more satellite breaks you down  
The counterfeit sky sells you out  
After all the change, nothing's changed  
Wake up laughing (wake up laughing) Are you mine all the time?  
When you dream (when you dream) One more satellite breaks you down  
The counterfeit sky sells you out  
After all the change, nothing's changed  
Wake up laughing and don't know who you are (who you are?) Are you mine? (who you are?) (When you  
dream) one more satellite breaks you down (breaks you down)  
The counterfeit sky sells you out (sells you out)  
After all the change, nothing's changed  
Nothing's changed
